PROFESSIONAL SUMMARY

Final-year Information Technology student at HELP University, completing a software development internship at Bluedale Group of Companies, where I built and deployed a production CRM system (Laravel, Vue.js) and am developing a cross-platform mobile app (Flutter). Experienced in full-stack web development, system design, and cloud platforms (AWS, GCP). Open to any IT role to deliver value in a collaborative, Agile team.

SKILLS

Programming Languages, Frameworks & Databases:

Java | Python | JavaScript | PHP | HTML/CSS | Laravel | Vue.js | React | Angular | Django | Node.js | Flutter | MySQL | PostgreSQL | MongoDB

Tools & Technologies:

Git | VS Code | Postman | Docker | AWS | GCP | cPanel | Bootstrap | Tailwind CSS | WordPress | Tableau | Jupyter Notebook | Figma | Splunk

Core Competencies:

Agile Methodology | SDLC | System Design | API Development | Data Analysis | UI/UX Design | Quality Assurance | Database Management | Object-Oriented Programming (OOP)

Soft Skills: Communication | Leadership | Teamwork | Adaptability | Active Listening | Creativity

EDUCATION

HELP University

Bachelor's Degree in Information Technology

CGPA as of May 2026: 3.32

May 2023 - July 2026 (expected)

PROJECTS

Final Year Project - FORTIROOM (IoT Smart Room Booking System)

- Developed a smart-room booking and access-control system with a PostgreSQL backend, deployed on Google Cloud Platform.
- Designed the system architecture and REST APIs for IoT integration, implementing authentication and booking management.
- Integrated ESP32 camera modules and a motion/smoke/door sensor suite for face-recognition room access (96% recognition accuracy, 3-5s unlock) and real-time monitoring.

Concert Ticket Booking Platform:

- Developed a full-stack concert ticket booking application using Angular, Node.js, and MongoDB to facilitate seamless event browsing and purchasing.
- Implemented user and admin interfaces for secure ticket reservations and event management.

Service Day Dashboard (Django Analytics Web App):

- Built an internal analytics dashboard with Django (MVT) and Chart.js, visualising customer and service metrics through interactive, filterable charts.
- Implemented search, date-range filtering and PDF export for management reporting.

WORK EXPERIENCE

Software Developer Intern, Bluedale Group of Companies

April 2026 - Present

- Developed and deployed a production CRM system using Laravel and Vue.js with 3 role-based access levels (Admin, Manager, Staff), hosted on cPanel with daily maintenance and support.
- Completed CRM handover to the company's existing system and began developing the KL The Guide mobile app using Dart and Flutter.

Customer Service Associate, The Peranakan

Nov 2022 - Apr 2023

- Delivered fast, client-focused service in a high-volume, fast-paced environment.
- Processed daily transactions accurately, managing point-of-sale (POS) operations.
- Optimized daily workflows and provided team leadership during peak hours.

Private Tutor (Python & Microsoft Word)

June 2024 - July 2024

- Developed and taught customized lesson plans for Python and Microsoft Word.
- Guided students through core Python programming logic and basic syntax.
- Delivered hands-on training to improve students' digital literacy and software skills.

ADDITIONAL INFORMATION

- Certifications:** Database Programming with SQL (Oct 2023), UI/UX Design Fundamentals (June 2024), IBM AI Fundamentals (July 2025)
- Languages:** English (Fluent), Cebuano (Native), Bahasa Malaysia (Basic)
- Interests:** Basketball, Tech Communities, Open-Source Development
