PROFESSIONAL SUMMARY

Final-year Information Technology student at HELP University, completing a software development internship at Bluedale Group of Companies, where I built and deployed a production CRM system (Laravel, Vue.js) and am developing a cross-platform mobile app (Flutter). Experienced in full-stack web development, system design, and cloud platforms (AWS, GCP). Open to any IT role to deliver value in a collaborative, Agile team.

SKILLS

Programming Languages, Frameworks & Databases:

Java | Python | JavaScript | PHP | HTML/CSS | Laravel | Vue.js | Angular | Node.js | Flutter | SQL

Tools & Technologies:

Git | VS Code | Postman | AWS | GCP | cPanel | Tableau | Jupyter Notebook | Figma | Splunk

Core Competencies:

Agile Methodology | SDLC | System Design | API Development | Data Analysis | UI/UX Design | Quality Assurance | Database Management | Object-Oriented Programming (OOP)

Interpersonal Skills:

Communication | Leadership | Teamwork | Adaptability | Active Listening | Creativity

EDUCATION

HELP University

May 2023 - Present

Bachelor's Degree in Information Technology

CGPA as of January 2026: **3.32**

PROJECTS

Final Year Project (Ongoing - FYP2) - FORTIROOM (IoT Smart Room Booking System)

- Developed a smart-room booking with access-control system using PostgreSQL and currently being configured for development on Google Cloud Platform.
- Designed a system architecture and APIs to support IoT integration, implementing authentication and booking management features.
- Currently in FYP 2 to integrate Raspberry Pi, cameras, and sensors to enable real-time monitoring and access control.

Concert Ticket Booking Platform:

- Developed a full-stack concert ticket booking application using Angular, Node.js, and MongoDB to facilitate seamless event browsing and purchasing.
- Implemented user and admin interfaces for secure ticket reservations and event management.

Software Developer Intern - Bluedale Group of Companies (Ongoing):

- Developed and deployed a production CRM system using Laravel and Vue.js, hosted on cPanel with daily maintenance and support.
- Completed CRM handover to the company's existing system and began developing the KL The Guide mobile app using Dart and Flutter.

WORK EXPERIENCE

Customer Service Associate, The Peranakan

Nov 2022-Apr 2023

- Delivered fast, client-focused service in a high-volume, fast-paced environment.
- Processed daily transactions accurately, managing point-of-sale (POS) operations.
- Optimized daily workflows and provided team leadership during peak hours.

Private Tutor (Python & Microsoft Word)

June 2024-July 2024

- Developed and taught customized lesson plans for Python and Microsoft Word.
- Guided students through core Python programming logic and basic syntax.
- Delivered hands-on training to improve students' digital literacy and software skills.

ADDITIONAL INFORMATION

- Certifications:** Database Programming with SQL (Oct 2023), UI/UX Design Fundamentals (June 2024)
- Languages:** English (Fluent), Cebuano (Native), Bahasa Malaysia (Basic)
- Interests:** Basketball, Tech Communities, Open-Source Development
